

Using the Story Words

In the glossary below, find the words to complete each sentence.

- The cousins rode the mission boat, Good Hope, across Queen Charlotte Sound to visit Jodi's pen pal April Bairns.
- Guardian Island Lightstation had a beacon light, foghorn, and lightkeepers who did weather observations several times a day.
- For his weather observations, Mr. Bairns used a rain gauge to check rainfall, a hygrometer to check humidity, a thermometer to check temperature, and a machine to read wind speed.
- An automatic sensor set the foghorns to blaring when particles of fog crossed a beam of light.
- The lightstation's electricity came from diesel-powered generator.
- Mariners often radio the lightstation for a weather report before boating across the sound.
- The lightkeepers' water came from a cistern of rain water in the basement.
- The workmen built a new launch facility so the lightkeepers wouldn't have to climb down to the cove to use their boat.
- Billy used a tripod and a telephoto lens to get good bird photographs.
- When the Sikorsky set down on the landing pad, its whirling rotors caused a powerful downdraft.
- When the Bluebell rammed and sank the Sea Sprite, Mike and Mr. Bairns climbed into the dinghy.
- From the air, the fiords looked like long blue fingers reaching back into the mountains.
